JUMPY! - User Guide
Installation and Launch

Method 1: Using CMD to Clone the Repository

1. Clone the Source Code:
   - Open Command Prompt (CMD).
   - Execute the command:

     ```
     git clone https://github.com/1-IT-Gymnazium/JUMPY!.git
     ```

   - This command clones the source code from the GitHub repository located at https://github.com/1-IT-Gymnazium/JUMPY!.
2. Disable Real-Time Protection:
   - Navigate to Windows Security, open 'Virus & Threat Protection'.
   - Go to 'Manage Settings' and turn off 'Real-Time Protection'. (Note: Follow the detailed instructions provided in the guide's images located at the end of this file).
3. Launch the Application:
   - Navigate to the directory where you cloned JUMPY!.
   - Find and open the JUMPY! folder, then double-click on `JUMPY!.exe` to start the program.

Method 2: Downloading as a ZIP File from GitHub

1. Download the ZIP File:
   - Visit the GitHub page: https://github.com/1-IT-Gymnazium/JUMPY!.
   - Click the green 'Code' button, then select 'Download ZIP'.
   - After downloading, unzip the file to your desired location.
2. Disable Real-Time Protection:
   - Navigate to Windows Security, open 'Virus & Threat Protection'.
   - Go to 'Manage Settings' and turn off 'Real-Time Protection'. (Note: Follow the detailed instructions provided in the guide's images located at the end of this file).
3. Launch the Application:
   - Open the folder where you unzipped JUMPY!, and locate `JUMPY!.exe`.
   - Double-click on `JUMPY!.exe` to start the program.

Both methods lead to launching the JUMPY! application, where you can begin using it immediately after starting it up.

Turning off 'Real-Time Protection' guid:
